

ONE MIND. MANY MACHINES.

SYSTEM SPEC

PLATFORM	ESP32-S3
TOOLCHAIN	KiCad 10
PROGRAM	Brain-to-Swarm
STRUCTURE	4 tracks / 3 levels
ACCESS	Public → Premium

ESP32 HARDWARE ENGINEERING · BREAKOUT TO BRAIN-COMPUTER INTERFACE

Every project ends in a board you designed, fabricated, and brought up yourself, with the design files and a verifiable certificate to keep. Twenty-two builds carry you from a USB-C breakout to a brain-computer interface that *reads a mind and commands a fleet*.

SYSTEM MAP · THE BRAIN-TO-SWARM CURRICULUM

22 BOARDS / 4 TRACKS / 2 CAPSTONES

LIVE DIGIKEY PRICING

FAB-READY GERBERS

SEALED CERTIFICATE AT /VERIFY

22

BOARDS

Sense, Act, Comms, and Power, wired as one skill tree of 33 dependencies.

8

STAGES EACH

Requirements, BOM, schematic, ERC, layout, DRC, gerbers, bring-up in KiCad.

DRC = 0

THE REAL GATE

You advance only on a clean check and fab-ready gerbers. Not points, not streaks.
